

Environmental Policy

At the Anemi Hotel & Suites we operate high standards of performance and advocate environmentally and socially sustainable business practices. Anemi Hotel & Suites has committed itself in the implementation of environmental management procedures.

Principles

We are committed to minimising the impact of our operations on the environment by means of a programme of pollution prevention.

We are committed to comply with all relevant environmental legislation and regulations

We are committed to protect the environment through continual improvement of our environmental performance. All our businesses take into account the effects that our activities have on the environment.

Intentions

- To understand the environmental issues associated with our activities
- To minimize the amount of wastes we dispose of, seek to recover through re-use or recycling as much as is economically practicable and ensure that the remainder is disposed of properly
- To minimise the use of energy and water through monitoring and increasing the efficiency of use and purchase environmental sound products wherever possible, while upholding the highest standards of comfort, quality and guest service
- To ensure that all employees are aware of their individual responsibilities for acting in accordance with the policy
- To set and review environmental objectives and targets and to implement an action plan, addressing waste reduction, energy and resources conservation and raw materials and products environmental evaluation. The hotel will release the necessary resources to achieve these objectives using the best available practices, which do not entail excessive cost.
- To communicate to our employees, customers and suppliers our policy and achievements in improving our environmental performance
- To incorporate environmental management into everyday business practice

- To encourage environmentally friendly, and where possible, local sourcing of products and services.
- To encourage engagement of our business with local communities

Our future targets are:

- Reduce energy consumption by 3% in the next 3 years
- Reduce water consumption by 3% in the next 3 years
- Reduce waste by 3% in the next 3 years

Reduce the use of potentially harmful chemicals by 2% in the next 3 years

All Heads of departments are directly responsible for the implementation of our target.
